

Modum Bad's publishing policy

Modum Bad aims to make the results of its research as widely accessible as possible for those who wish to use them. We aspire to establish a comprehensive open policy and are actively working towards attaining a strategic position to realize this objective. Our intention is to advocate for the allocation of a dedicated budgetary provision to support the implementation of this policy. However, we recognize that achieving this may not be an immediate prospect.

Nevertheless, our collaborations with universities and the avenue of publication through them provide us with the opportunity to pursue open access. Leveraging their agreements with various journals, we can publish research in a manner consistent with open access principles.

Modum Bad supports the principle that the outcomes of publicly funded research should be openly accessible to everyone. Through the collaboration with the universities, researchers at Modum Bad are encouraged to publish in reputable journals of high quality within their respective fields,

When publishing, national guidelines for open access must be adhered to (<https://www.regjeringen.no/no/dokumenter/nasjonale-mal-og-retningslinjer-for-apen-tilgang-til-vitenskapelige-artikler/id2567591/>). We are committed to supporting the principles outlined in The San Francisco Declaration on Research Assessment, DORA (<https://sfedora.org/>)
